

IRMA TIMES

Vol. 19. No. 47.

Irma, Alberta, Friday, May 24th, 1935.

NEWS ITEMS FROM JARROW

Mr. C. E. Shaw, manager of the Great West Life, is spending the week-end at the home of Mr. and Mrs. H. Barton.

The members of the Board of Trade, as well as the Ladies' Aid, are busy preparing for the Jarrow third of June sports day.

Raymond Lisson was taken to the Wainwright hospital early Saturday morning and an operation for the appendix was performed. We are pleased to learn that Raymond is doing well.

J. Bovencamp had the misfortune of having his foot caught in a disc while cultivating his land last Friday afternoon. After lying helpless on the ground for some time when help came, it was discovered that his leg was broken. Medical assistance was immediately sought, but unfortunately Dr. Greenberg was away. A doctor from Wainwright was called, and when he arrived the leg had become badly swollen, making it a difficult task to set the broken bone. We wish Mr. Bovencamp a speedy recovery.

JARROW SPORTS MONDAY, JUNE 3rd

Jarrow and district will again celebrate June 3rd in a manner befitting the occasion. Committees are now preparing a variety of events that will be sure to please the large crowd attending the Jarrow sports. The day is being sponsored by the Jarrow board of trade.

Admission to grounds: Adults, 25c each; children under 16, free.

The ladies' aid will serve lunch at their booth on the grounds.

A big dance will be held in the evening, bringing to a close a real eventful day.

The difference between a necessity and a luxury is about twelve payments.

NEW HIGHWAY MAPS

Alberta Motor Association Issues 100,000 New Highway Maps

During this season, the touring bureau operated at branches on the Alberta Motor Association in Edmonton, Calgary and Lethbridge are expecting heavy demands for service.

At these offices, where courtesy is one of the by-words every consideration is given to the requests of motorists desiring information. Experts who have made a careful study of routes are able to pick out the most comfortable and convenient ones, so that motorists may travel one way and return by another, never once covering the same ground unless there is a desire to see some sections twice during the trip.

From time to time, the motor offices receive letters of commendation for their routing services.

Mileage, garages, hotels, all forming the official appointments of the A. M. A., are shown on these maps.

For those seeking good hunting or fishing spots, the maps contain valuable information.

The maps are of particular value to visitors, of whom greatly increased numbers are expected to visit Alberta parks and other beauty spots during the coming season. In view of the campaign inaugurated by the Canadian Travel Bureau to attract a greater number of tourists, the highway directional maps will be of extreme assistance.

MUNICIPAL DISTRICT OF BATTLE RIVER No. 423

NOTICE TO RATEPAYERS

Go-For-'Em Gopher Poison may be purchased by ratepayers of the M. D. of Battle River No. 423, at the Municipal Office, Irma, Alberta.

This is a pure strychnine poison, which treats 5 to 10 quarts of grain. Price 35c per can.

CHAS. WILBRAHAM, Secretary-Treasurer, M. D. Battle River No. 423, 17-24-31-37.

SPORT PEEPS

H. E. Mann of Memphis, just for fun, helped a small bull calf over a fence, and daily after that hoisted the animal to his shoulders. Of course the animal grew, yet Mr. Mann was able to keep up with the added weight. A picture shows the 850 lb animal draped over the shoulders of this auto mechanic. He claims to have hoisted to maturity two other bulls. Oh, all right, if you do not want to believe it, try it yourself.

Vincent Richards met with an accident through an auto crash that will end his career in tennis. He is but 32, yet for 20 years has been a star performer in tournament competition. At 15 he and Big Bill Tilden won the doubles championship of the United States. Since 1926 Richards has been a professional, with a very lucrative income.

Much adverse comment has been written on the effect strenuous training has on the beauty lines of girls. That group of girls from Des Moines certainly carried no excess poundage, anywhere. They were attractive in face and figure, walking with a grace and ease most pleasing to any male eye at least. They played basketball with every ounce of energy, yet endeared themselves to the Edmonton sports, by their demeanor wherever they went. They made a fine impression.

The New York Yankees are now known as "The Hitless Wonders." Of course it has nothing to do with the departure of Babe Ruth, yet the remaining group simply cannot get the stick to connect with the little sphere. They went once for two years without a coat of whitewash, yet this season already have been daubed thrice with this decoration. They are in the cellar position.

A friend, according to a local contributor to this column, is a person who knows more bad things about you than you know yourself and still thinks you're swell.

Alberta Crop Report No. 2

Issued by the Department of Agriculture, Government of the Province of Alberta, Edmonton, May 18th, 1935

Following one of the most backward seasons in Alberta's history, seeding of wheat is now general over the province, fully three weeks later than in 1934. In the extreme southern and south-western sections of the province, wheat seeding is from 25 to 50 per cent completed, while in the east-central and south-central districts the wheat is practically all in. Throughout the north-central districts seeding has just become general and the percentage in the ground is at this date comparatively small. In the northern districts, with the advent of warmer weather, seeding has begun and will be well under way this week. Due to the lateness of the season, much of the seed is going in without the usual careful preparation.

Cold weather, with frequent falls of heavy wet snow, and rain, interspersed with periods of high winds, characterized April and the first half of May, and it was not until the present week that seasonable spring weather arrived. Intermittent showers of rain are still interfering somewhat with farm operations.

Surface moisture conditions may fairly be stated to be the most satisfactory for some years, although reserve moisture in most of the province is not any too plentiful. Continuous precipitation during the present week has, while delaying operations, created an optimistic feeling.

The extreme southern part of the province records precipitation above the average, particularly in the Medicine Hat area. In the area to the east of the Calgary-Macleod line there has been some soil drifting, but this has not as yet been serious, and further rains have helped to minimize the menace. In the sections where serious drought conditions have prevailed for a number of years, moisture conditions are reported to be fairly satisfactory.

Held back by late spring conditions, hopper hatching is not expected to commence for another two weeks. The extent of this menace depends entirely upon future weather conditions. Such warm weather would tend to bring out the hoppers in large numbers very quickly in the heavily infested areas, and farmers in these areas are urged to be prepared to deal with the situation. Generally speaking, the hopper menace is not expected to be as great as in the past three years.

The general tendency this year is to reduce wheat acreage and increase the acreage in coarse grains. In one or two districts, it is reported that the decrease of wheat acreage will be comparatively heavy, but the general decrease over the province is not expected to be great, although it is too early to make a definite estimate.

United Church Notes

The services next Sunday, May 26, will be at Albert and Alma Mater at the usual hours, conducted by a group from Irma. The service in the evening will be in charge of the local W. M. S. at 8 p.m.

Rev. J. R. Geeson left Monday morning to attend the conference in Calgary. He will return in time to conduct services in country and town as usual on June 2nd. The junior choir is repeating their Easter Cantata in town June 2nd, and all those who were unable to attend it at Easter will have an opportunity to hear same and we urge all to not miss this treat.

U. F. W. A. MEETING

The May meeting of Harmony local No. 140 met at the home of Mrs. J. Marshall on Thursday, May 9th, with five members and eleven visitors present. President Mrs. Marshall in the chair. The roll call was answered by "A Tribute to Mothers". Special Mothers' Day features were presented during the program, including a sale of flowers which was generously supported by the guests.

After the routine business was disposed of a splendid paper by Mrs. Allen, who is supervisor of Harmony Juniors, on "Mothers and Juniors and their work". Recitations were given by Irene McFadyen, Jacqueline Craig and Fay Allen.

Guests present were Mrs. E. Elliott, Miss Elliott, Mrs. McCartney, Mrs. Dootson, Miss Robertson, Mrs. Herder, Mrs. W. Prior, Mrs. E. Guy, Mrs. L. Meyer, Mrs. M. Allen and Miss Brown.

Delicious refreshments were served at the close by the hostess. The next meeting is scheduled for June 18th, at the home of Mrs. E. Prior.

Transplanting Trees

When trees die after transplanting the cause may be often ascribed to lack of sufficient care on the part of the transplanter. Trees and shrubs should be dug out as carefully as possible so as to retain a large proportion of the roots. The more roots there are, the greater the chance the plant has of living. The roots should not be allowed to become dry from the time of digging until the trees are in the ground again. They may be protected from drying in transit by protecting them with wet moss or wet sacking. If the roots of evergreens, especially pines, become dry even for a short time, the trees are almost sure to die. When planting, a hole should be dug large enough so that the roots may be spread out and not crowded or doubled up. The hole should also be deep enough so that the tree will be one or two inches deeper than it was in the woods or nursery. If the soil is at all poor, it should be discarded if possible and

the hole filled with good soil which should come in close contact with the roots and be trodden down. Manure should not be put in the hole with the soil as it may burn the roots or make the soil so loose that it will dry out easily. Several pamphlets dealing with tree planting for ornamental and other purposes are issued by the Dominion Department of Agriculture. They are available on application to the Publicity and Extension Branch, Ottawa.

For Job Printing see E. W. Carter.

FOR SPRING PLANTING

The Irma Perennial Gardens have a good list of hardy perennials and shrubs, small fruit bushes and strawberry plants, priced to sell. Come and see them or write for list prices.

A Very Good Collection for \$4.00
25 assorted Gladioli, 1 Bleeding Heart, 1 Columbine, 1 Delphinium, 3 assorted Peonies, 6 Tiger Lillies, 8 Elegans, 3 Corals, 1 Day Lilly and 2 Iris. These are all large plants and bulbs.

An All Lilly Collection

One each of the following for \$1: Coral, Alta, Hybred, Tiger, Elegans and Day.

Large 2 to 3 ft. Bushy non-sprouting Lilac for 50c.

THE SIGN OF A FAIR DEAL

The Three-Star Imperial oval sign marks a place where you can buy with confidence; where you can be sure of good value and full measure.

It is the symbol of an organization that has steadily improved the quality and consistently reduced the price of petroleum and petroleum products—for gasoline prices today are lower than ever before.

The Three-Star Imperial oval sign stands for a fair deal to all: to you, the consumer, and to the labor engaged in making and marketing Imperial products. The thousands of Imperial Oil workers are well treated. Five thousand of them are part owners of the Company. They are paid good wages. They have sickness and death benefits and old age pensions which mean that in affliction or old age they and their families do not become dependent on funds which must be raised by taxation.

Because they are fairly treated, Imperial Oil employees work loyally, enthusiastically and enterprisingly. That is why, through the years, it has been possible steadily to improve the quality and consistently to lower the price of Imperial gasoline and oils.

Planning

In these days much is heard of the art of planning and the dire necessity for scientific, constructive planning in finance, economics, industry, social services, in fact in all the organization of our modern life and its varied interests and activities. Indeed, if a person was prepared to unthinkingly accept the advice being so freely tendered in many quarters, only one conclusion would be reached, namely, that mankind in mass could, if it would, definitely plan and order its way of life, and clearly and authoritatively scale and draw a plan that would work with the simplicity and accuracy of the multiplication table.

But life is not like that; too many contrary factors enter into the scheme of things and life, too many factors, influences and natural laws which are beyond human control to permit of any such artificial planning that will prove workable and fool proof. As the poet Burns so well expressed it:

The best laid schemes o' mice an' men
Gang aft a-gley,
An' lea's us naught but grief and pain,
For promised joys.

Two years ago President Roosevelt's "brain trust" decided that the whole economic life of the United States could be planned and charted in advance; that it could scientifically plan and control the production of that great country so as to overcome and prevent what was alleged to be the evils of over-production. The nature stepped in, withheld its usual bountiful supply of rain, sent excessive heat and blistering winds and swirling dust storms; and in a brief space of time reduced production over man's mistaken efforts, and to a far greater extent, until within a few months a shortage of supplies faced the nation instead of an over-production, which over-production had actually resulted from a previous form of artificial planning in the shape of tariffs and other trade restrictions.

So wheat farmers were bonused, not to grow wheat, but to stop growing it; cotton planters were bonused to stop growing cotton; farmers were paid to quit raising hogs, and so on and so forth, and the consuming masses of the people were taxed in order to raise the funds wherewith to pay these bonuses on destruction. Their nature stepped in, withheld its usual bountiful supply of rain, sent excessive heat and blistering winds and swirling dust storms; and in a brief space of time reduced production over man's mistaken efforts, and to a far greater extent, until within a few months a shortage of supplies faced the nation instead of an over-production, which over-production had actually resulted from a previous form of artificial planning in the shape of tariffs and other trade restrictions.

Following the Great War, the statesmen of the world assembled in Paris to draft a treaty of peace and to plan the future of Europe and the world. They labored for months, created elaborate international machinery to direct and control world affairs, re-arranged the boundaries of countries, and gave birth to new nations. On paper their plans looked good; they were hailed as a great advance in the cause of world peace and international goodwill and co-operation.

But in the years that have followed all the passions, prejudices, suspicions, racial and religious animosities, and vagaries of human nature have continued to hold away over millions of mankind. Much of the planning has proved an abject failure, some of it has been thrown into the discard, and what remains is in danger of destruction through another world upheaval.

Thus has it been amply demonstrated that man cannot direct and control the immutable laws of Nature, nor can he forecast them in any scheme of planned economy he may devise; neither can a few planners, however able and sincere they may be, draft plans and charts which will work despite all the selfishness, the ambitions, the ignorances, passions and prejudices of man.

This being so, the nations are now being told by the planners that mankind in the mass can no longer be trusted; that democratic forms of government are a failure; that instead of the people creating and controlling their governments, forms of government must be set up which, controlled and directed by a few, will superimpose their will upon the masses, control and order the people, instead of the people controlling the governing bodies.

Such a plan may be inaugurated; it may work for a time, but not for long. It can never possess any degree of permanence, because man was created a free being with a mind, a will, a soul of his own, and in the final analysis he will, because God and his own nature intended that he must, work out his own salvation. No other power, and least of all a government, can do it for him.

Nevertheless, there must be planning and there must be control and direction. Everything cannot be left haphazard, otherwise chaos and disorder would ensue. But it must be recognized that there are limitations in all planning, and those imposed by Nature's laws and by human frailties cannot safely be ignored. Nor can the inborn desire and determination of every man to be a free man and enjoy liberty be denied; any attempt to do so will breed revolt. It always has, it always will. But liberty does not mean license, and in demanding liberty for himself each man must recognize the rights of others and accord liberty to others.

Therefore, in all our planning the improvement and advancement of the individual must precede improvement of and advancement in any system that may prevail. It is putting the cart before the horse to try and improve the system first and thereby improve man; it must be the other way round. God does not remove all evil and temptation in the world, but we are taught to pray that we be not led into temptation.

The proper study of mankind is man, and the proper, only permanent, planning is by individual man, namely, that he so order his life and his activities, so control his ambitions and his passions, as to come within the plan laid down in the Golden Rule—Do unto others as ye would that they should do unto you.

Helps Building Industry

Chemistry Comes To Aid With Many New Materials

Even eggs and milk may enter the making of new construction materials in a building boom predicted by famous chemists at the opening session of the American Chemical Society's tercentenary celebration in New York.

A boom in the building industry inspired by discoveries of chemists, many of them made during the depression, was forecast by Prof. James R. Withrow of Ohio State University.

Artificial stones are already made in every color and with any degree of hardness a customer desires. Wood rot and metal rust are both stopped by numerous new protectives.

Bricks that partake of the lightness of thistle-down and other light weight construction materials promise much higher, yet even safer skyscrapers.

Queen Mary's Tea Chest

Gift From Ceylon To Be Exhibited In Toronto

Visitors to the Ceylon exhibit at the forthcoming Canadian National Exhibition in Toronto will have an opportunity to see the beautiful chest presented to Her Majesty at Christmas by the Empire Tea Growers. The chest is made of rare and lovely woods—rosewood from India, inlaid with satinwood and ebony from Ceylon and purlicheart from British Guiana, the woods being left in their natural state at the express wish of Her Majesty. The inlay on the lid has the Queen's own royal cypher. When presented to Queen Mary the chest contained fifteen pounds of the finest grown Empire tea, valued at over \$3 per pound.

NOT A RHEUMATIC PAIN FOR 4 YEARS

70-Year-Old Man Praises Kruschen

A man who once suffered severely from rheumatism writes: "For a long time I suffered with rheumatism, and at one time was laid up for about nine weeks. About five years ago I was advised to try Kruschen. I did so, and have continued using them ever since. Kruschen did the trick, as I have not had a rheumatic pain for over four years. I am nearly 70 years of age, and feeling fine, and always able for my day's work—thanks to Kruschen." A. S.

Kruschen dissolves away those needle-pointed crystals of uric acid which are the cause of all rheumatic troubles. It will also flush these dissolved crystals clean out of the system. Then if you keep up "the little daily dose," excess uric acid will never form again.

Of Canadian Make

Dominion Supplies Medium-Quality Gauntlets For English Motorists

Motorist and motor cyclists in the United Kingdom wear leather gauntlets when driving during the winter. Even during the summer months motor cyclists use them when travelling at night. A large proportion of the medium-quality motor cyclist's gauntlets are of Canadian make, according to the Industrial Department of the Canadian National Railways. While the British are experts when it comes to sheepskin gloves, strange as it may seem, in the case of those made of heavier leathers, such as cow, mule and horse hide, they have to be imported.

A Dangerous Procedure

Doctor Warns Against Forced Giving Of Cod Liver Oil

Dr. Irving Graef, pathologist of Bellevue hospital, New York, told the American Association of Pathologists and Bacteriologists, mineral oils and animal fats drawn into the lungs of infants and adults had proved fatal in six cases of pneumonia. Cod liver oil, described as good when taken into the stomach for bone building, Dr. Graef said was deadly when it entered the lungs. He cited one case to show the oil had entered the lungs through forcing a reluctant child to swallow it by holding his nose.

Umbrella Works Idle

Because one cannot carry an umbrella when wearing a uniform and maintain one's dignity, the rain shields have gone out of style in Germany. As a result 150,000 people in the umbrella industry have been thrown out of work and manufacturers are seeking ways and means to bring the umbrellas into its own again.

Another Surgical Find

Human Suffering Reduced By Operation On Pain Nerves

Surgery on the nerves of pain offers hope of reducing human suffering.

The operations possible were reviewed by Francis C. Grant, M.D. of Philadelphia, at the meeting of the American College of Physicians.

Some of the fibres form the bundles of nerves, just as separate fibres form threads, carrying the sensation of pain; others give the movement orders.

By cutting the pain fibres in the spinal cord pain can be stopped in the legs and up into the pelvis. Touch and position nerve fibres remain unimpaired and the movements of the legs are not interfered with.

Another operation severs the roots of some of the nerves, but is seldom used because, while it relieves pain, it interferes with movement.

Seeking to block the "pain pathways" through the nervous system is the latest method of attack. This has been done successfully for some pelvic malignancies and for angina pectoris.

Powerful Searchlight

Throws Beams Which Will Illuminate Objects Within Fifty Miles

Residents of Pittsburgh city gazed in wonderment at a powerful shaft of light that penetrated the darkness for many miles. It originated from what engineers say is probably the world's most powerful mobile searchlight undergoing a test prior to its delivery to the United States army.

The searchlight is a 60-inch giant and throws a beam of 750,000 candle power. Engineers who built it say the light's concentrated, narrow beam will illuminate any object within 50 miles. The "detecting" equipment is entirely mobile, carried aboard trucks.

An aeroplane with a 100-foot wing spread flying 20,000 feet high and six miles away appears to the human eye about as big as a wasp.

To find an enemy bombing plane under such conditions—and travelling at 250 miles an hour—would be quite difficult. The searchlight is designed to do it, and expose the plane to the fire of anti-aircraft artillery.

Upholding The British

New York Paper Sticks To Statement About War Debts

The New York Daily News says: "We've received a number of unsatisfactory letters in reply to our editorial in which we said England is right in refusing to pay any more of its war debts to us for the time being. These letters advise us that we are in the pay of the Redcoats, traitors to Uncle Sam, trying to lick the King's boots, etc.

Let's come down to brass tacks. How about our debts to our own people (and to any foreigners who happened to buy our bonds)? We aren't paying them, are we? President Roosevelt has taken 40 cents out of every dollar, and he won't pay a dollar of those debts in gold. Furthermore, our Supreme Court sustained that default. So if John Bull is a nasty old repudiator, what is Uncle Sam?

The fact is the war cost so much that every country which took part in it, including ourselves, has had to repudiate a large part of its war debts."

Capels For Russian Farms

Farmers of Soviet Russia are to be supplied 257 camels this year to be used in the establishment of new camel farms. The farm in the semiarid Yedich district of Western Kazakhstan now has 2,355 ships of the desert, the herd increasing 24 per cent in 1934.

How Spare Pennies Grow

British Post Office Savings Increased By \$28,000,000 Last Year

More pennies and shillings than ever are being "put into Post Office Savings Banks in Britain.

The head office has announced that deposits of small savers have reached the record figure of £355,000,000. They increased by £28,000,000 during last year alone. Over the last two years they have increased by £50,000,000.

These large sums are made up entirely of the occasional spare coins of villagers and townsmen in Britain. One of the methods of saving is to buy special stamps and stick them in a savings book. When a certain number have been collected the book is given in to the local post office and the amount represented is credited to the saver's account.

Last year 250,000 "home safes" were issued. These are special post office home money boxes which can be taken to the local post office when the owner desires and the amount in them credited to his account.

The Post Office Savings Bank now has more than 9,500,000 depositors. And that number is increasing by 12 per cent. each year.

Are Becoming Important

Aviation Is Creating Interest In Islands Of Ocean

Soon every little island in the ocean is going to find itself important and it is certain that, with aviation developing as it is, places which in the past have not even been spots on the map will become centres of interest. Here, for instance, is the case of the Wake Islands, away out in the Pacific Ocean. These are three small islets, with a total area of not more than 2,600 acres, yet they are to be a point of call on the proposed U.S.-China air route, plans for which are now well under way with Pan-American Airways and the United States Government co-operating.

If on rising in the morning you stand in your pyjamas before the open window and slap your chest with both hands for several minutes you will notice a crowd slowly gathering in the street below.

Clubs for railroad workers are being organized in Russia.

Bible Distribution

Colporteurs Deliver An Average Of 30,000 Bibles A Month

By dog team in the far north and on foot through every part of Canada, Colporteurs distribute an average of 30,000 Bibles a month, according to the annual report of the Canadian branch of the British and Foreign Bible Society.

An increased demand for Bibles in English is reported from foreign language groups of workers in Western Canada.

After all expenses were met, \$30,000 was sent to London for worldwide work compared with \$23,000 in 1933. Bibles distributed showed an increase of 22,000.

Main Street

Mrs. E. P. Beacock returned last Sunday from a visit to Vermilion.

Mrs. Mino, of Edmonton, is visiting her sister, Mrs. Carbol, this week.

The highway road gang are working in close to town this week and making good headway.

Since Friday, May 24th, is a holiday, the stores remained open Wednesday afternoon, May 22nd.

Mr. Peter Milne of Edgerton, Liberal candidate for Wainwright constituency, was a visitor in Irma, May 21.

A number of Irma folk attended the Social Credit convention in Edmonton Wednesday and Thursday of this week.

Mr. and Mrs. Locke, Mrs. Hadlow, Mr. W. Masson and Mr. Limes Meyer are among the visitors to Edmonton this week.

Plan your work so that you can take a holiday on Wednesday, July 3, and attend the Canadian Legion sports in Irma.

Mrs. J. G. Fenton received word on Wednesday last of the death of her grandfather, Mr. W. J. Sutherland, of South Edmonton.

Mr. and Mrs. Lows drove down from Innisfree on Monday and called on Chas. Millans and visited the perennial gardens for a few plants.

The Irma School board have had basket-ball standards erected on the school grounds so the scholars will have a chance to learn the game and enjoy this healthy exercise.

Mr. and Mrs. Mahlon Watson were over to the Irma perennial garden last week and took home a truck load of shrubs and plants. He reports things looking good in the Provost district.

Wheat seeding is practically completed in this district, the weather, however, has been cold all spring, and growth is very slow.

A general meeting of the Irma Branch, Canadian Legion, will be held in Hedley's hall on Saturday evening, June 1st. The Ladies' Auxiliary will also meet at the same time. A full attendance is requested.

Mr. Simmons and son are busy dividing their building, which has served as an office and work shop, into sections and moving them to other locations. An office has been fitted up in their garage building nearby.

Mr. and Mrs. A. C. Carbol and family spent Thursday and Friday of last week in Edmonton. While there they attended the graduation exercises of the General hospital, where Miss Eva Carbol, sister of A. C. Carbol, graduated this year. Miss Carbol lived at the home of Mr. and Mrs. J. R. Whyte at Irma for a short time before going into training.

The Social Credit delegates for the Wainwright constituency gathered in Wainwright on Thursday evening, May 16th, and elected four men as possible candidates who will attend the convention in Edmonton this week when one of them will be chosen as a candidate at the next provincial election.

Someone had an eye for good poultry when a number of year old hens and a rooster were taken from a village hen house recently. It might be well for all poultry owners to keep tabs on their birds. The parties who took these birds would be well advised to return them and save themselves considerable trouble.

Word has just been received that Alice May, daughter of Mr. and Mrs. G. A. Sisson, formerly of Irma, was married to Mr. Arda Crawford Bow-

ser, on April 28th, in the First Baptist church at Pittsburg, Penn., U.S.A. The bride in this happy event graduated as a nurse three years ago and has followed her profession since then in Pittsburg. The Times extends best wishes for a long and happy wedded life.

THE WINDING ROAD

(By Ralph E. Congdon)

The long and straight road lies ahead
In one unchanging line,
Without a single challenge
To the fancies that are mine.

In one intense monotony
It follows on its course—
No curves to cause illusions,
No imagination's source.

But on the curving, winding road,
Each curve inspires a dream;
Will each new bend unfold to view
A fairer scenic scheme?

What new sensations be in wait
Beyond the curve ahead?
A scene to make my pulses leap—
Or sadden me instead?

So give to me the winding road
With prospects unforeseen;
For one who courts adventure
In a world that's too serene.

Cutworm Control

Although the farmer knows much about the matter, the amateur gardener little suspects that long before he sows his highly-prized seeds an enemy has been waiting in preparation for immediate assault. This is the cutworm which attacks all kinds and conditions of plants, and so far as agriculture is concerned, is such a menace that each year the Dominion and Provincial Departments of Agriculture publish the latest intelligence on the most effective means of counteracting the ravages of this destructive pest. Bran bait, says the Dominion Department of Agriculture, has given most effective control for many years and it is made up as follows: bran 20 lbs., Paris green ½ pound, molasses 1 quart, and water about 2½ gallons. In making the bait, the dry ingredients should be mixed thoroughly first. The molasses is then stirred into the water and this solution added to the bran and Paris green. In mixing the bait, only enough water should be added to reduce the material to the consistency of wet sawdust. The mixture must not be made sloppy but should be so that it will crumble in the hands and slip through the fingers easily. Land that was heavily infested last year should be treated before the plants are set out. This is done by broadcasting the bait at the rate of 15-20 pounds per acre a few nights before transplanting. The bait should be spread in the evenings just before dusk, and, if possible, on a still warm night.

LOST—Two black geldings, branded: lazy F and reversed G on right shoulder. One has white stripe in face, the other has white star on forehead. These horses strayed from the range around Kinsella. \$20 reward will be given for information leading to their recovery. — Fred Green, R.R. 2, Sedgewick P. O. 24-31-7p

PUBLIC NOTICE

Public notice is hereby given that there has been introduced in the Council of the Municipal District of Battle River, No. 423, a bylaw of which the following is a short synopsis:

- By-law No. 45
1. In this By-law unless the context otherwise requires the term animal means and includes, Horses, Cattle, Sheep, Swine, Goats, Poultry, and all other animals commonly known as Domestic animals.
 2. No animal the property of any person shall at any time be at large in those portions of the said Municipal District commonly known as Division 4, but more particularly only described as follows: All section 25, N. ¼ 26, E. ¼ 27 (north of railway), all sections 31, 32, 33, 34, 35, 36 in township 45-9, W. 4th Mer, and all of township 46-9, W. 4th Mer. Sections 1 to 36 inclusive.
 3. For all purposes of this By-law any animal shall be deemed to be at large which is off the premises of its owner and is not under the direct control of its owner or someone acting under his authority or is not confined within a building or fenced field.
 4. The Council of the said Municipal District may, from time to time, establish pounds at such places as it may seem advisable, and may appoint such poundkeepers as it may seem advisable. All poundkeepers shall be bound by the provisions of the Domestic Animals Act (Municipalities) being Statutes of Alberta Chapter 25, 1923.
 5. Any animal at large contrary to the provisions of this By-law may be impounded and dealt with in accordance with the Domestic Animals Act, Chapter 25, Statutes of Alberta, 1923.
- And that a copy of the same may be seen at each of the following places:
- Municipal Office M.D. Battle River, Main street, Irma, Alberta.
Irma Post Office, S.W. corner of the S.W. 2-46-9, W. 4th.
S. E. corner of S.E. 16-46-9, W. 4th, Ross School, and
S.E. corner of S.E. 35-46-9, W. 4th.
- And further that unless within 30 days from the publication of this notice at least Ten (10) resident electors of the said Division 4 petition the Council to submit such By-law to the vote of the resident electors of the said Division 4 of the Municipal District the Council will proceed to pass the same.
- CHAS. WILBRAHAM,
Secretary-Treasurer,
M. D. Battle River No. 423,
Irma, Alberta.
